MAZAN

STUNNING ACRYLIC PANELS

A MODERN, COST EFFECTIVE ALTERNATIVE TO BOTH GLASS & TILES

Innovative Mazan acrylic glass is the perfect modern wall, shower and feature panel. Ideal for a diverse range of applications throughout both commercial and residential projects, Mazan can be used as an alternative to both traditional glass and ceramic wall tiles. It has the look of stunningly reflective colour backed glass, but is much quicker to accurately shape and install on site and comes at a lower price cost.

WHAT IS MAZAN?

Mazan is an affordable, yet dazzlingly beautiful collection of acrylic glass panels for reception areas, retail displays, kitchens, washrooms in fact in all living spaces. It is the 21st century alternative to both ceramic tiles and traditional glass.

It has a standard range of diverse solid and metallic colours and has a thickness of 4mm. This creates a fantastic colour intensity and reflection throughout Mazan's surface and exposed edges - just like colour backed glass.

Mazan is also available in any RAL colour, enabling you to perfectly match it to other features and materials in your project. Along with this colour match service, Mazan can be uniquely tailored to your space using digital imagery created by you whether it be a real landscape or an abstract scene: quite simply any image can be applied. In addition, digital printing can be specified for stunning modern signage.

Mazan is kind to the environment. It uses much less energy than traditional glass during its production and can be recycled.

Both beautiful and tough, Mazan is a highly durable surface that is 25 times more impact resistant and stronger than glass, so it will not shatter when it is bumped into. It has a high heat resistance (up to 100°C) and will withstand a kettle steaming against it one minute and an icy blast the next.

BACK PAINTED SURFACE

HOW DOES IT WORK?

Mazan is very easy to keep clean using warm water and a microfibre cloth. Non-abrasive cleaning materials are available that are designed to be used with Mazan's acrylic polymer glass surface. Strong cleaning chemicals are not required. Because Mazan is 100% waterproof, germs will not develop on its clean surface. These natural properties mean that bacteria will have no chance of survival, ensuring the highest standards of hygiene wherever Mazan is specified.

All Mazan panels are protected throughout the installation because both the front and rear surface of each panel have a removable protective film. The front surface protective film is designed to be removed only after the installation is complete to keep the Mazan panels in a perfect condition.

Mazan provides a totally hygienic and safe surface to work with.

MAZAN ACRYLIC GLASS

FRONT PROTECTIVE FILM

Quite simply, Mazan has a much **lower cost** compared to traditional glass. But not only is the product great value, it's also much quicker to fit, saving valuable time on all installations.

Mazan can be **machined to size on site**, so once delivered it can be installed immediately, unlike traditional glass which has to be precisely measured and templated first and then manufactured in a specialist workshop before installation can even begin.

This also means that panel cut-outs for plug sockets can be **easily formed** on site making the installation easier and significantly less costly.

Mazan acrylic glass has an excellent resistance to scratches and the ultraviolet rays from sunlight.

In the unlikely event Mazan panels become accidentally scuffed or scratched, these marks can be simply polished away. Please refer to Mazan's care and maintenance leaflet for details of this repair process.

Mazan can be thermoformed by specialist fabricators to create shapes and curves ranging from the dramatic to the subtle to bring a seamless, unique quality to your design.

COMMERCIAL APPLICATIONS

It is of course important that the best possible first impression is made on visitors: regardless of whether the venue is a private or publicly funded development. Mazan's strikingly colourful and light reflective qualities achieve that right impression every time.

In retail stores, Mazan's brilliant reflections of light and intense colours provide great style and life to retail product displays and help create a shopping experience second to none.

In cinemas and other public entertainment arenas, you can make the reception a space that people remember and want to return to. This can be achieved by combining Mazan mirror finish panels with cleverly positioned lighting to reflect Mazan's solid and metallic colours.

WALL PANELS

Mazan wall panels are perfect for updating an office space to bring it right into the 21st century.

Strong, stunning and easy to fit, Mazan panels can add a splash of colour to brighten a room even when the sky is cloudy outside.

In shops or bars: menu's, drinks price lists and other signage or imagery can be printed directly onto the panel.

FEATURE PANELS

Mazan acrylic glass can be used in a variety of ways throughout a commercial building to bring colour, style and light.

Shown here used in the front panel of a reception desk, the Mazan colour Swimming Pool colour works beautifully alongside the stark white frame.

2.

WASHROOMS

As it's easy to clean, waterproof and incredibly hygienic, Mazan is perfect for commercial washroom environments.

Mazan can be used as splashbacks for wash hand basin units, modestly screens and wall plumbing panels.

2. Wash hand basin unit splashback shown in the colour: Woodland

Mazan has a comprehensive choice of solid and metallic colours combined with numerous practical qualities and this versatility makes Mazan acrylic glass a perfect material for both individual homes and large domestic apartment developments.

In the kitchen, splashbacks and upstands benefit from Mazan's waterproof qualities, while its strength and durability make Mazan perfect for panels installed under a breakfast bar for example. In the bedroom, Mazan can be used as a door surfacing material for cupboards and wardrobes and in the washroom Mazan makes a perfect shower wall, splashback and colour matching bath panel.

Mazan really is at home everywhere.

RESIDENTIAL APPLICATIONS

1.

KITCHEN SPLASHBACKS

Mazan splashbacks, unlike traditional glass, can be cut on site and require no specialist tools, making installation quick and easy.

Super strong and even more beautiful, Mazan splashbacks are perfect for kitchens.

TECHNICAL SHEET SIZES

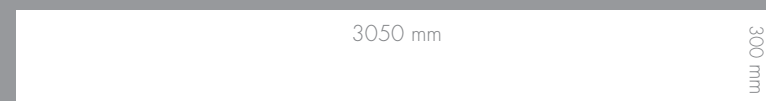

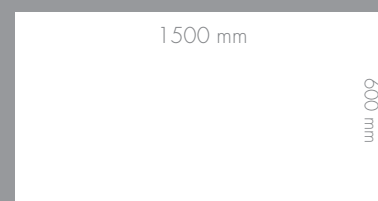

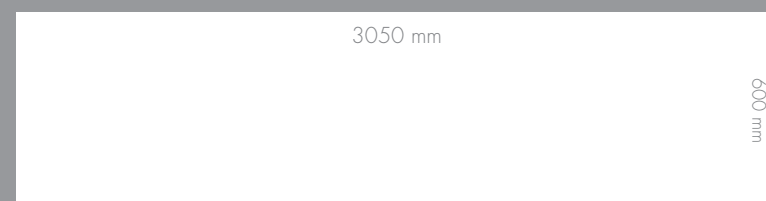

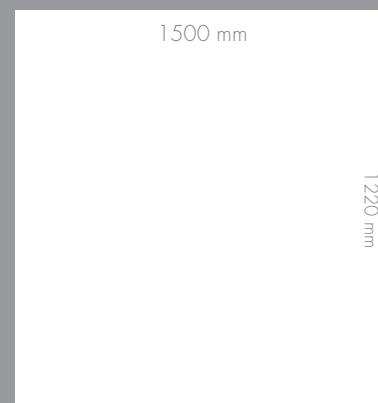

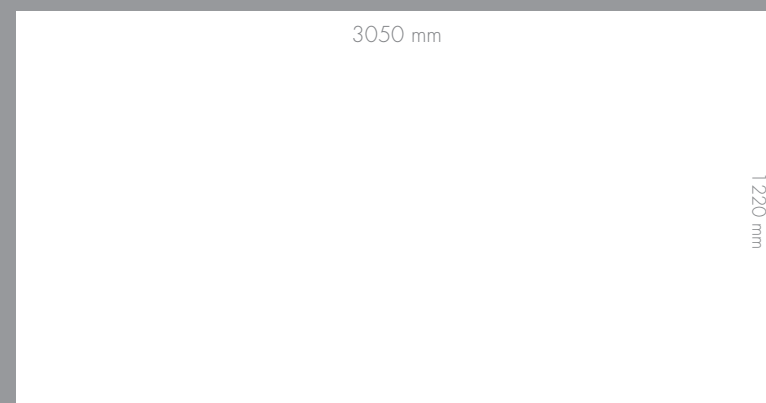

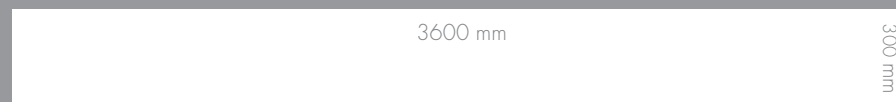

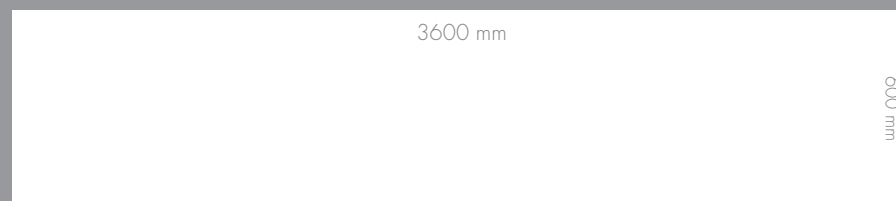

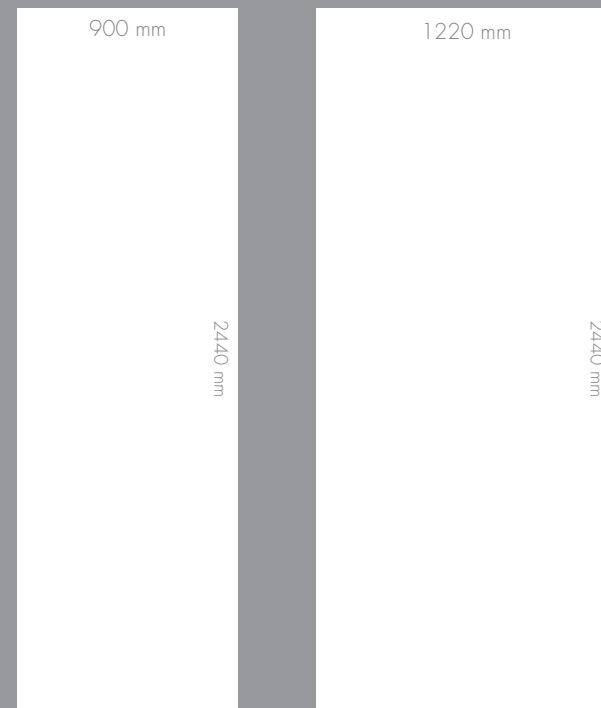

MAZAN ACRYLIC GLASS PANEL SIZES

3600 x 600 x 4mm
3600 x 300 x 4mm
3050 x 1220 x 4mm
3050 x 600 x 4mm
3050 x 300 x 4mm
2440 x 1220 x 4mm
2440 x 900 x 4mm
1500 x 1220 x 4mm
1500 x 600 x 4mm

TRADITIONAL GLASS PANEL SIZES

600 x 200 x 6mm
900 x 200 x 6mm
600 x 750 x 6mm
900 x 750 x 6mm

Due to the extensive range of Mazan panel sizes available, you can order almost exactly how much you need, this creates minimal off cuts which is not only better environmentally but also saves cost.

10 YEAR WARRANTY

Mazan has a 10 year limited warranty. Please refer to the 'Care and Maintenance Guide' for full warranty details.

RAL COLOUR MATCH

If you have a particular colour in mind, Mazan can colour match to any RAL colour - please see the Mazan website for more details and to ask for a RAL colour chart. www.mazan-glass.com/colour

INSTALLATION

Mazan's UK and Ireland distributor is **Blackheath Products Ltd**, who can assist with any technical assistance that is required during the design and installation stages.

Completely unlike traditional glass, which has to be templated and then machined in a specialist factory, Mazan can be easily cut to size and installed on site using standard woodworking tools. Thus, Mazan avoids the delays and inconvenience of traditional glass and ceramic tile products. Mazan has a comprehensive choice of panel dimensions available from stock. This reduces the number of wasteful offcuts on a project, significantly saving cost and being kind to the environment. The larger panel dimensions (up to 3600mm lengths) ensure potentially unattractive panel joints are minimised.

Mazan's beautiful metallic colours are directional and so it is important to design a selection of panels that can be installed in the same direction as each other to avoid light reflection colour changes.

EXTRUSIONS

Mazan is also available with exclusively colour matched extrusions. These ensure an encased finish on internal and external corners as well as panel end sections. The extrusions are available in either a metallic chrome finish or colour coordinated to your chosen Mazan panel. However, most Mazan installations are specified without these extrusions. This allows the brilliantly reflective and highly polished Mazan glass edges to be seen and enjoyed as part of the design.

ADHESIVES

Mazan is easily bonded to a wall or other installation surface using a low modulus, neutral cure silicone sealant designed specifically for Mazan. This adhesive is readily available from the Mazan UK and Ireland distributor: **Blackheath Products Ltd**.

GAS HOBS

Traditional 6mm thick glass panels, which are colour matched to Mazan, are used as splashbacks in conjunction with Mazan behind gas hobs. Traditional glass panels are not required behind electric, induction or ceramic hobs. Please refer to the Mazan installation brochure for more details.

CUTOUTS

Cut outs for electrical sockets and other objects can be easily created on site, saving a lot of time and cost compared with glass. It is important to design any cut outs within a Mazan glass panel to have a minimum 8mm radius. The size of electrical components will easily cover this radius. Mazan's distributor's technical sales force can always assist with advice for this aspect of a project.

CLEANING & CARE

Mazan is easy to keep clean using warm water and a microfibre cloth or chamois. For stubborn stains, non-abrasive cleaning materials are available that are designed to be used with Mazan's acrylic polymer surface. Strong cleaning chemicals are not required. Because Mazan is 100% waterproof, it is completely hygienic and bacteria will not develop on its clean surface.

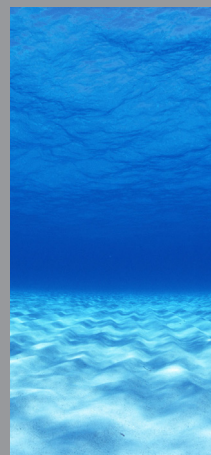

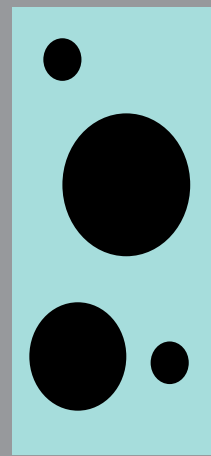

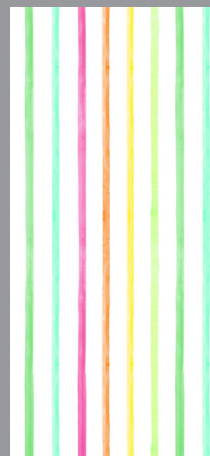

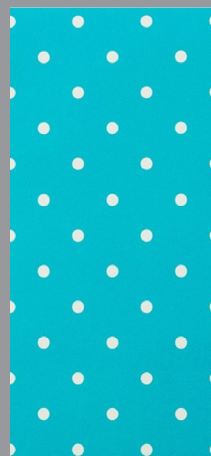

Unlike tiles and glass, Mazan is tough and will not fracture or shatter. Minor scuffs and scratches can be polished away, repairing the surface to its original high gloss finish. Please refer to Mazan's care and maintenance leaflet for more details.

DIGITAL PRINT

Our amazing new digital print range enables you to create your perfect bespoke wall or splashback.

Any high resolution image can be used which can either be a photograph or a graphic pattern.

Please give Mazan's distributor: Blackheath Products Ltd a call for any help or advice on the use of Mazan's digital print service.
