CORIAN® SOLID SURFACE CARE AND MAINTENANCE FOR FACILITY MANAGERS

Introduction

Corian® Solid Surface meets the demanding needs of today's commercial surfacing applications. As a solid, non-porous surface, Corian® Solid Surface can be maintained with minimum care to retain the original appearance. This document provides Corian® care and maintenance guidance for facilities managers for commercial installations. This is general guidance applicable to general routine care, for more specific fitted scenarios of hotel, food servery, laboratory and healthcare installations, contact the Blackheath sales team.

General Routine care of Corian® Solid Surface

For everyday cleaning, use soapy water or widely available surface cleaners. Remove excess detergent with a microfibre cloth, rinse the surface with warm water then wipe with a dry soft cloth (i.e. microfibre). If necessary, use a microfibre cloth and clean the surface with an ammonia based cleaner, then rinse with water and dry with a soft cloth. This procedure will remove most dirt and residue from installations made with Corian® Solid Surface and from Corian® sinks and basins.

Always clean using a circular motion, from the front to the back, then side to side, overlapping the circles until the entire area has been cleaned. Do not use abrasive or mild abrasive cleaners on high gloss or dark surfaces, instead use soapy water or a non abrasive surface cleaner prior to rinsing with water and drying with a soft cloth. Be aware that limescale can build up if water is left to dry on the surface. To prevent this, it is important to wipe the surface completely dry with a soft cloth after spills and cleaning. Some colours of Corian® Solid Surface may require more frequent cleaning to maintain a uniform finish.

Like all materials, Corian® Solid Surface will develop slight abrasion marks in normal daily use. Dark, heavily pigmented colours will show scratches, dust and ordinary wear and tear more readily than lighter, textured colours and will require more attention than lighter colours.

All cleaners used should be rinsed thoroughly from the surface with water before drying the surface. Ensure with all cleaning to dry the rinsed surface with a soft cloth.

Although liquids cannot penetrate Corian®, it is best to wipe up spills as they occur.

Corian® Solid Surface can be finished matt/satin, semigloss and high gloss. Contact your Corian® Design sales expert if you are unsure of your finish. Typically, lighter colours have a matt/satin finish, while darker colours have a semi-gloss or gloss finish depending on the specified use. All sinks and basins are finished with a matt/satin finish. Some guidance may vary by finish type.

Preventing Damage

Some chemicals are not suitable for use on Corian® Solid Surface. Avoid surface contact with:

- Strong chlorinated solvents
- Chloroform
- Methylene chloride (paint removers)
- Very strong acids such as concentrated sulfuric and hydrochloric acids
- Acid drain cleaners should not be used

Surfaces exposed to these agents should be promptly flushed with water.
