# NATURE IN MOTION

WOW
THAT'S CORIAN®!

The 2026 Corian® Solid Surface palette captures Nature in Motion through seven new colours shaped by biophilic forms and earthy palettes. These tones bring natural movement reconnecting design with the emotional impact of nature.

Crafted with soft motion, layered undertones, and organic clarity, the palette supports the way people heal, learn, gather, and focus across healthcare, education, hospitality, and food service. Each colour balances aesthetic refinement with high-performance durability, helping architects and designers create intuitive, human-centered spaces without sacrificing function.

Unlike natural materials, Corian® can bend, curve, wrap, and integrate seamlessly —unlocking sculptural freedom that brings Nature in Motion to life. Designed to complement the existing Corian® portfolio, the 2026 colours expand creative possibilities while ensuring continuity across active specifications. They offer a warm, modern evolution of nature-inspired design that invites architects and designers to say: "Wow—that's Corian®."
