CIRCULAR LETTER NR. 22/09

Bra, 29/09/09

**Re.: SHEETS IN CONTACT WITH FOODSTUFF**

The present circular letter is to inform you that in accordance with the "EC Regulation nr. 2023/206 of the 22/12/2006 on good manufacturing practice for materials intended to come into contact with foodstuffs "in force since 01/08/08 and the" Regulation nr. 1935/2004 of 27/10/04 on materials intended to come into contact with foodstuffs ", ABET LAMINATI tested the Print HPL PF 0.9 mm and obtained the relevant certificate of conformity issued by the Institute ISEGA and to be renewed every 2 years.

The certificate is valid for all PRINT HPL in every option of thickness and typology, while the collections SERIE METALLI, METALPRINT, MET DECOR, SILVER, Foldline and Tefor® are excluded.

In compliance with the regulations, and in addition to the certificate, in case of orders of material to be used in prolonged contact with food, or, if the contact with food shall be specified by the customer as a condition of the product, please follow the directions below:

- Insert the specific "AL" = ALIMENTI ; it will activate a warning to the warehouse to affix copy of the enclosed label on the pallet.

- Include in CM2 of the head of the order the following note:

***"Please clean the surface carefully before use and remove the label if this is on the side of the sheet in contact with foodstuffs. If the laminate is sanded, only the decorative surface is approved for contact with foodstuffs. "***

NB Unless otherwise indicated, it is implied that the laminate is suitable for occasional and temporary contact with foodstuffs, as for example in applications for kitchens. In that case it is not necessary to follow the instructions above.

We remain available and may I take this opportunity regards.

Abet Laminati spa
