CUBICLES AND LOCKERS COLLECTION

Abet Laminati, Europe's largest manufacturer of high pressure laminates based in Bra in Northern Italy producing over 22,400,000 square metres of high pressure laminate every year.

With offices and warehouse in London's Docklands, Abet Ltd has a large stockholding available through a comprehensive network of UK and Ireland distributors.

Abet Laminati's High Pressure Compact Grade Laminate is a hardwearing, durable and aesthetic solution for cubicle and locker applications with excellent resistance to impact, scratches and abrasion.

- They are ideal for use in areas of high moisture and humidity such as leisure centres and swimming pool changing rooms as its solid core construction means there is no risk of peeling, cracking or delamination.
- Recommended for use on in high traffic areas such as in schools, hospitals, airports and other areas subject to heavy use and wear.
- Its non-porous fabrication and edging also make it ideally suited for use in sterile and hygienic environments including hospitals, laboratories and food preparation areas.

HIGH PRESSURE LAMINATE MANUFACTURE

PROPERTIES

Sturdy, shock and scratch resistant

Excellent performance to fire

High resistance to water and steam

High resistance to chemicals/solvents

Antistatic properties

Wide range of colours available

Easy to fabricate

Easy to clean

Excellent hygienic properties

Manufactured to EN 438:2

DIGITAL PRINT

CARE AND MAINTENANCE

Our high pressure laminate is manufactured in the most modern and largest HPL factory in Europe and will give years of excellent service provided a few simple rules are followed.

Light dirt or stains can be removed easily with warm water and mild detergent. Stubborn marks should be removed using a non-abrasive cream cleaner or mild domestic bleach. Avoid harsh abrasives or scouring

powders. Grease marks can be removed with a proprietary paint and graffiti remover. Hair dyes, bleaches, caustic alkalis and strong mineral acids should be wiped off within a short period.

We strongly recommend that all Abet Laminati HPL products are stored, conditioned and fabricated in accordance with our own and BLFA guidelines. More detailed information is available from our office.

POLARIS COLLECTION

Polaris is the revolutionary ultra-matt antimicrobial product with a smooth and velvety touch which is highly resistant to shock, scratches, heat and fingerprints and available in 10 decors from 0.9mm through to 20mm. Contact us for more information and samples.

LAMISHIELD COLLECTION

Lamishield is an antimicrobial high-pressure laminate designed for use for medical equipment, laboratories, hygienic environments and food preparation areas. BioCote® silver-ion technology is integrated within the decorative top layer to provide a healthy surface which reduces bacterial presence by 99.9%. It is available with most decors.

HIGH PRESSURE LAMINATE

HGP:

Horizontal Grade Postforming:
Sheet laminate for bonding onto flat or postformed surfaces for horizontal/vertical applications

VGP:

Vertical Grade Postforming:
Sheet laminate for bonding onto flat or postformed surfaces for vertical applications only

- High Pressure Laminate 0.8mm postforming grade can be fire rated by special order (when bonded with other FR materials).
- It is a competitive durable and hardwearing solution which can be postformed as required.
- Particularly recommended for use on vanity units and IPS panels.

COMPACT GRADE LAMINATE

CGS:

Compact Grade Standard:
Compact grade laminate for use as flat self-supporting panels for horizontal/vertical applications

- Compact Grade Laminate meets Euroclass B (12mm) or Euroclass C (10mm) and is ideal for use in areas of high moisture and humidity as its solid core construction means there is no risk of peeling, cracking or delamination.
- Particularly recommended for use on cubicles, washrooms and lockers in high traffic areas (such as in schools, hospitals and airports) and in places of high humidity (such as leisure centres and swimming pool changing rooms).
- Its non-porous fabrication and edging make it ideally suited for use in sterile and hygienic environments including hospitals, laboratories and food preparation areas.
